

# SUBHAM MISHRA

## SOFTWARE DEVELOPER

Kathmandu, Nepal | +977 9747250426 | [subhammishra1412@gmail.com](mailto:subhammishra1412@gmail.com)  
[github.com/subhamMishra1412](https://github.com/subhamMishra1412) | [linkedin.com/in/subhammishra1412](https://linkedin.com/in/subhammishra1412)

### PROFESSIONAL SUMMARY

Full-Stack Software Developer with hands-on experience designing, building, and deploying production-ready web applications. Highly proficient in modern JavaScript ecosystems (React, Node.js, Express.js) and relational databases (PostgreSQL), backed by a strong academic foundation in Computer Science, Mathematics, and secure coding principles. Proven ability to deliver complex end-to-end features—including RESTful APIs, secure JWT authentication, and interactive data visualizations—from initial architecture to live cloud deployment.

### TECHNICAL SKILLS

|                |                                                                                                          |
|----------------|----------------------------------------------------------------------------------------------------------|
| Frontend       | React, Vite, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3, GSAP, React Hook Form, Recharts, Zod          |
| Backend & DB   | Node.js, Express.js, PostgreSQL, SQL, Firebase, RESTful APIs, JWT Authentication                         |
| Cloud & DevOps | Git, GitHub, Vercel, Render, Neon DB, VS Code, XAMPP / phpMyAdmin                                        |
| Core CS        | Data Structures & Algorithms, DBMS, Operating Systems, Secure Coding Fundamentals, Java, Python, C#, PHP |

### PROJECTS

#### DevSphere – Full-Stack Project Management Platform

2026 – Present

[Live Demo](#) • [GitHub](#)

- Architected and deployed a responsive, full-stack project management platform supporting multi-user CRUD workflows, achieving a 90+ Lighthouse performance score across key pages through Vite code-splitting and optimized Tailwind CSS styling.
- Engineered RESTful API endpoints with Node.js, Express.js, and PostgreSQL, optimizing database queries and payload structures for rapid data retrieval across interactive dashboard analytics.
- Implemented stateless authentication using JSON Web Tokens (JWT), session-aware protected routing with deep-link redirects, and strict schema validation on all API inputs using Zod to ensure data integrity and prevent malformed requests.
- Built a real-time notifications system with a dedicated REST endpoint that surfaces urgent and overdue tasks, giving users at-a-glance visibility into deadlines directly from the navigation bar.
- Implemented dual project-tracking views—an interactive Kanban board and a sortable task table—letting users toggle between visual and tabular workflows for managing tasks.
- Designed and implemented a cohesive, component-driven design system spanning authentication, dashboard, and project-management views, standardizing layout, typography, and status/data visualization patterns across the application for a consistent, professional UI.
- Managed multi-platform cloud deployment, hosting the frontend application on Vercel and configuring the backend REST API service on Render with a Neon serverless PostgreSQL database.

#### Marvel Maniacs – Interactive Media Catalogue

2025

[Live Demo](#) • [GitHub](#)

- Developed a dynamic Marvel cinematic catalogue featuring chronological phase tracking, real-time news feeds, and embedded media streaming.
- Built an interactive, highly responsive user interface using core web technologies (HTML5, CSS3, JavaScript ES6+) and deployed the application live on Vercel.

## Personal Portfolio Web Application

2025

[GitHub](#)

- Designed and developed a responsive software developer portfolio to showcase full-stack projects, technical proficiencies, and live applications.
- Integrated GSAP-driven animations to enhance UI/UX, creating a polished, engaging, and modern visual experience for prospective employers.

## PROFESSIONAL EXPERIENCE

---

### Front-End Web Development Intern – CodTech IT Solutions (Remote)

May 2025 – Jul 2025

[Live Demo](#) • [GitHub](#)

- Engineered and deployed a responsive online learning platform end-to-end featuring video lessons and interactive quizzes, implementing automated HTML-to-PDF certificate generation that replaced manual grading and issuance workflows.
- Integrated Firebase authentication and NoSQL real-time database synchronization, delivering near real-time state sync for student progress tracking across concurrent user sessions.
- Spearheaded front-end architecture using HTML, CSS, and JavaScript, executing end-to-end version control via Git/GitHub through to live production deployment.

## EDUCATION

---

### Bachelor of Science (BSc) in Computer Science & Mathematics Kristu Jayanti College (Autonomous), Bengaluru

Aug 2023 – Jul 2026

CGPA: 7.08 / 10

## CERTIFICATIONS & COURSES

---

- Foundations of Cybersecurity & Play It Safe: Manage Security Risks – Coursera (Google Cybersecurity Track), 2025
- Introduction to SQL – Simplilearn SkillUp, 2025 | Introduction to Operating Systems – Swayam NPTEL, 2025
- Introduction to Python – Infosys Springboard, 2023

## LEADERSHIP & EXTRACURRICULAR

---

- Sports Leadership: College Cricket Team Member (intercollege tournament experience across PES, Christ, and Azim Premji Universities); Event Coordinator for College Sports Fest.
- Community & Tech: Active National Service Scheme (NSS) volunteer for cleanliness and blood donation drives; technology presenter at Plutonia Tech Exhibition (2024).

## LANGUAGES
